How "Alien" Are You?

GREETINGS

After having the night adventure, what's in your mind? If there were no clouds, you will be able to see the stars. Some of them are planets. Have you ever thought that there were any creatures living there? Or maybe you are an alien cult which ingests raw alien movies on the theatre. You all are not wrong. Everyone has the curiosity. Some groups in the community are researching about any unidentified thing and even an artist can make something unexplainable. In scientific rules, you may create the original thing. Maybe...

BETA-UFO INDONESIA: ALIENS DO EXIST IN INDONESIA

"We are not a UFO cult," is written on the website. This group is not telling joke. They do research, documentation, and give public education about UFO

Founded on October 26, 1997, this organization has done researches and analyzed the UFO's sighting in Indonesia. The name BETA is taken from words "Benda Terbang yang Aneh" which means unidentified flying object. They mixed the name to be BETA-UFO so it makes easy anyone to recognize them. The word BETA is also used by J Salatun, a veteran UFO researcher.

UFO Sighting

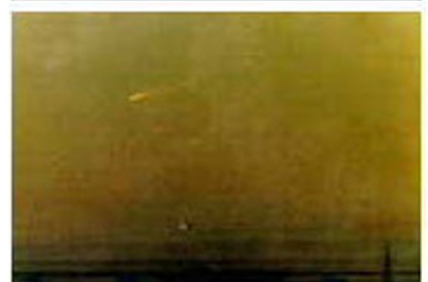

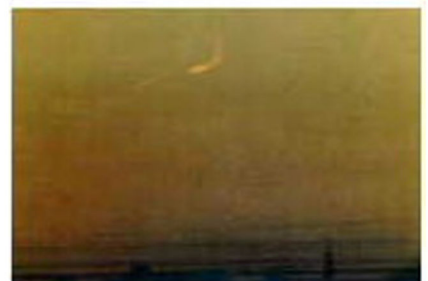

BETA-UFO is collecting many of UFO sightings. Every sighting can be reported even not includes the photograph. It is not easy to have any photograph in every sighting. Sometimes, UFO appears only few seconds. Like the fact that reported by Vicentia Divka, "On the last Sunday (Dec 9, 2007), about 11 pm, I was on the way to Menteng via Jl Sultan Agung. When the car through near of the reservoir, my child pointing his finger up to the sky. I thought it was a tree or electric pole... Oh it turns of something like group of birds or something flying. They formed in "V" shape and have a very dim red light color..."

Many people are also curious about crop circles. Some of them have proved that everyone can make it. They include the how-to-make-crop-circles in the articles. Otherwise, in some researches, it is true that human could make the crop circles, but, it would take long time. The research is evaluating the data of a witness and the process of crop circle makings. The data says that the witness saw the field is normal at 9pm and the crop circle was being sight about 3am. Of course, without any footmarks around it. Thus, the crop circle making takes a longer time and of course, there are so many footmarks everywhere. What do you think?

Aliens in Surabaya

Basically, there are some scientific names like Ufonaut (the creature who drive UFO) or sometimes it called ET (Extra Terrestrial) and also ALF (Alien Life Form). However, people often call them with name: alien.

In 1946, Pantai Kenjeran, Surabaya has been visited by weird creatures. A file from BETA-UFO tells that a girl has seen two creatures which like Japanese. When being seen, those creatures run to the weird metal round-shaped thing parked on the beach.

PINK FLOYD: SOUND WHICH COMES FROM ANOTHER DIMENSION

"Breathe, breathe in the air. Don't be afraid to care..." Phrases which were sung after long silent intro and some strange sound played in the opening song of the album

"And balanced on the biggest wave. You race toward an early grave," those closes the song and beginning the next song which full of strange sounds and voices. It is a moment that happen when you listen to Pink Floyd's the Dark Side of the Moon album. The two songs, Speak to Me/Breathe and On the Run, imply the whole environment you'd feel in the album.

Almost everyone is questioning where the idea of the sounds coming from. Some says they had a progressive rock's sound but it would also be destructed because prog-rock is too wide over to interpret Pink Floyd. Someone in the forum says, "Prog, Art-Rock, Psychedelic, it all works. Pieces of the album 'Ummagumma' could also be classified as Space rock." This is actually not wrong. The complexity of the sound cannot be recognized that easy.

Lloyd Grossman, a reviewer of Rolling Stone also says "it's a fine album with a textural and conceptual richness." He also adds "there is a certain greatness in the album that exceeds mere musical melodramatics and is rarely attempted in rock. The Dark Side of the Moon has flash—the true flash that comes from the excellence of a superb performance." From his review about the Dark Side of the Moon reveals the sound in the album is really unusual and has the peak of opulence. However, most people like to call it as a Pink Floyd sound than grouping it into the specific genres which released on the media. Furthermore, because of the mortality of its modern sound, some communities even call it as the sound from another dimension.

HOW "ALIEN" ARE YOU?

*You can now test are
you an alien or not by
answering these questions*

Do you feel that you are not coming from the Earth?	Yes No
When talking with people are you feeling not comfortable?	Yes No
Do you believe in conspiracy theory?	Yes No
Have you seen the Lochness monster?	Yes No
Do you talk to the tree?	Yes No
Is your skin able to peel by your conscious request?	Yes No

So, here is the result...

4-5 Yes: You are an alien

3 Yes: You are an introvert

Below 3 Yes: You act like you're an alien, it means, you're a pathetic human
